XRI003 FISIOTEK 3000E

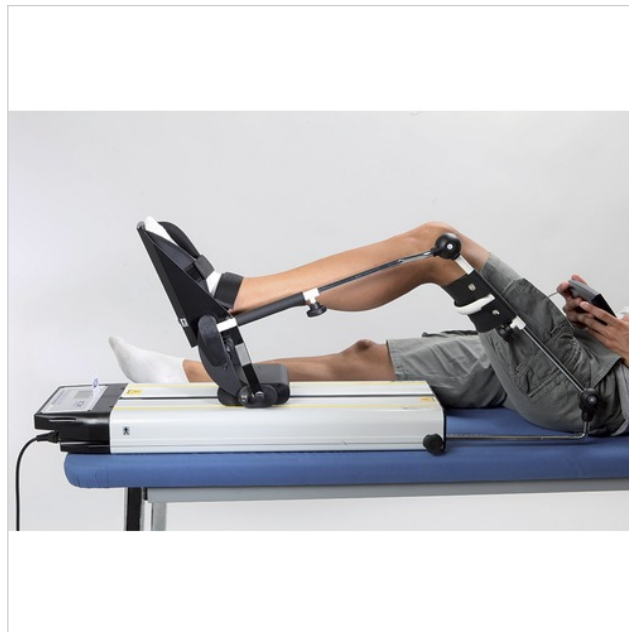

This equipment allows the knee and hip to be mobilized through a flexo-extension movement.

It is operated by a direct current motor controlled by a circuit board with microprocessor. On the outside, there is a fixed keypad which is used to program each function, and a floating keypad for the patient to stop and start the movement via the STOP and START keys that perform the same functions as those located on the fixed keypad.

The top part of the equipment is the area where limbs are placed on; this can be adjusted according to the limb size; to perform an adjustment you need to know the length of the patient's limb, measured from the trochanter major to the ankle bone.

TECHNICAL FEATURES:

Knee and hip mobilization
Speed control
Workout duration control
Resistance
Pause during flexion
Warm Up cycles
Adjustable foot rest
Knee movement range: $-10^{\circ} \div 120^{\circ}$
Hip movement range: $-7^{\circ} \div 115^{\circ}$
Repetitions at extension limit
Repetitions at flexion limit

Technical specifications and dimensions

Power supply :	85 ÷ 260 V - 50 ÷ 60 Hz
Electrical safety :	Class 1 B Standard EN 60601-1
Electromagnetic compatibility :	Group 1 B Standard EN 60601-1-2
Classification :	as per EEC Directive 93/42 Class IIa
Net weight :	9.5 Kg
Gross weight :	13.5 Kg
Packaging Dimensions (LxLxH) :	105 x 40 x 37h cm
